Scoring

Test	Score	Reason
Content Security Policy (CSP)	−20 ✕	Content Security Policy (CSP) implemented unsafely. This includes `'unsafe-inline'` or `data:` inside `script-src`, overly broad sources such as `https:` inside `object-src` c `script-src`, or not restricting the sources fc `object-src` or `script-src`.
Cookies	-	No cookies detected
Cross Origin Resource Sharing (CORS)	0 ✓	Content is not visible via cross-origin resource sharing (CORS) files or headers.
Redirection	0 ✓	All hosts redirected to are in the HTTP Strict Transport Security (HSTS) preload list.
Referrer Policy	0* ✓	`Referrer-Policy` header set to `no-referrer` `same-origin`, `strict-origin` or `strict-origin-when-cross-origin`.
Strict Transport Security (HSTS)	0* ✓	Preloaded via the HTTP Strict Transport Security (HSTS) preloading process.
Subresource Integrity	-	Subresource Integrity (SRI) not implemente but all scripts are loaded from a similar origin.
X-Content-Type-Options	0 ✓	`X-Content-Type-Options` header set to `nosniff`.

Test	Score	Reason
X-Frame-Options	0* ✓	**`X-Frame-Options`** (XFO) header set to **`SAMEORIGIN`** or **`DENY`**.
Cross Origin Resource Policy	-	Cross Origin Resource Policy (CORP) is not implemented (defaults to **`cross-origin`**).

* Normally awards bonus points, however, in this case they are not included in the overall score (find out why).

CSP analysis

✗ Content Security Policy (CSP) implemented unsafely. This includes **`'unsafe-inline'`** or **`data:`** inside **`script-src`**, overly broad sources such as **`https:`** inside **`object-src`** or **`script-src`**, or not restricting the sources for **`object-src`** or **`script-src`**.

Test	Result	
Blocks execution of inline JavaScript by not allowing **`'unsafe-inline'`** inside **`script-src`**	✗	Blocking the exec strongest protecti Moving JavaScrip site more maintair
Blocks execution of JavaScript's **`eval()`** function by not allowing **`'unsafe-eval'`** inside **`script-src`**	✓	Blocking the use prevent the execu
Blocks execution of plug-ins, using **`object-src`** restrictions	✓	Blocking the exec as inherited from loading Flash or J
Blocks inline styles by not allowing **`'unsafe-inline'`** inside **`style-src`**	✗	Blocking inline sty modifying the cor styles to external more maintainabl
Blocks loading of active content over HTTP or FTP	✓	Loading JavaScri to execute arbitra policy and changi
Blocks loading of passive content over HTTP or FTP	✓	This site's Conten passive content s protocols such as load them over H
Clickjacking protection, using **`frame-ancestors`**	✗	The use of CSP's grained control ov
Deny by default, using **`default-src 'none'`**	✗	Denying by defau your Content Sec resources you did

Test	Result	
Restricts use of the `<base>` tag by using `base-uri 'none'`, `base-uri 'self'`, or specific origins.	✕	The `<base>` tag ca scripts from untru
Restricts where `<form>` contents may be submitted by using `form-action 'none'`, `form-action 'self'`, or specific URIs	✕	Malicious JavaSc sensitive form dat for data exfiltratio
Uses CSP3's `'strict-dynamic'` directive to allow dynamic script loading (optional)	-	`'strict-dynamic` load all your site's track `script-src`
