>Key Concepts</h2>
    <p style={{color:"#94a3b8",fontSize:14,lineHeight:1.6,maxWidth:420,margin:"0 auto"}}>
      Before you start, here are the key terms and concepts this app uses. Understanding these
will help you make better financial decisions.
    </p>
  </Cd>

  <Cd><ST>🎯 The Magic Number</ST>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
      Your <strong style={{color:"#60a5fa"}}>Magic Number</strong> is the total amount of money
you need to have saved by the day you retire. If you invest that amount at a conservative rate, it
will generate enough income to fund your desired lifestyle for your entire retirement — and
reach $0 on your last planned year.
    </p>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7,marginTop:10}}>
      It depends on: how much you want to spend per month, how long your retirement will last,
what other income you{"'ll"} have (Social Security, pension), and how you invest during
retirement.
    </p>
  </Cd>

  <Cd><ST>💵 {"Today's Dollars vs Future Dollars"}</ST>
```

```
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
      <strong style={{color:"#f1f5f9"}}>{"Today"+q+"s dollars"}</strong> means the purchasing
power of money right now. Due to inflation, $100 today buys more than $100 in 20 years. This
app shows everything in {"today"+q+"s dollars"} so you can compare numbers intuitively —
$5,000/mo means $5,000 of {"today"+q+"s"} purchasing power, regardless of when it occurs.
    </p>
  </Cd>

  <Cd><ST>📈 Nominal vs Real Return</ST>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
      <strong style={{color:"#f1f5f9"}}>Nominal return</strong> is what your investment earns
before accounting for inflation. <strong style={{color:"#f1f5f9"}}>Real return</strong> is what you
actually gain in purchasing power — nominal return minus inflation.
    </p>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7,marginTop:10}}>
      Example: if your investment earns 7.5% and inflation is 2.5%, your <strong
style={{color:"#22c55e"}}>real return is 5.0%</strong> — {"that"+q+"s"} your actual wealth
growth.
    </p>
  </Cd>

  <Cd><ST>🏦 Investment Profiles</ST>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7,marginBottom:12}}>
      Each profile represents a different mix of risk and return:
    </p>
    <div style={{display:"grid",gap:8}}>
      {PROFILES.map(function(p){return(
        <div key={p.id} style={{padding:"10px
14px",borderRadius:10,background:"rgba(0,0,0,0.15)",border:"1px solid
rgba(255,255,255,0.04)"}}>
          <div style={{display:"flex",justifyContent:"space-between",alignItems:"center"}}>
            <span style={{fontSize:13,fontWeight:600,color:"#f1f5f9"}}>{p.icon} {p.name}</span>
            <span style={{fontSize:12,color:p.color}}>{(p.nomReturn*100).toFixed(1)}% nom /
{(p.realReturn*100).toFixed(1)}% real</span>
          </div>
          <div style={{fontSize:12,color:"#64748b",marginTop:4,lineHeight:1.5}}>{p.desc}</div>
        </div>)})}
    </div>
    <p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7,marginTop:12}}>
      <strong style={{color:"#f1f5f9"}}>60/40</strong> means 60% stocks + 40% bonds — a
classic balanced portfolio.
      <strong style={{color:"#f1f5f9"}}> 80/20</strong> is more aggressive (80% stocks, 20%
bonds).
```

<strong style={{color:"#f1f5f9"}}> 100% Equities is all stocks — highest potential return but most volatile.
</p>
</Cd>

<Cd><ST>📊 Volatility</ST>
<p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
<strong style={{color:"#f1f5f9"}}>Volatility measures how much an investment{"'s"} value fluctuates year to year. A profile with 15% volatility means in any given year, your return could swing roughly ±15% from the average. Higher return profiles tend to have higher volatility — {"that"+q+"s"} the risk-reward tradeoff.
</p>
</Cd>

<Cd><ST>💰 Current Savings vs Monthly Savings</ST>
<p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
<strong style={{color:"#f1f5f9"}}>Current savings is what you have today — bank accounts, 401k, IRA, brokerage accounts. This is your starting point.
</p>
<p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7,marginTop:10}}>
<strong style={{color:"#f1f5f9"}}>Monthly savings is income minus all expenses and debt payments — the money you add to your investments each month. Both grow through compounding over time.
</p>
</Cd>

<Cd><ST>📐 Inflation</ST>
<p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
Inflation is the gradual increase in prices over time. At 2.5% annual inflation, something that costs $100 today will cost about $164 in 20 years. This app defaults to <strong style={{color:"#f1f5f9"}}>2.5% (historical US average) but you can adjust it.
</p>
</Cd>

<Cd><ST>🏠 Real Estate Equity</ST>
<p style={{fontSize:13,color:"#94a3b8",lineHeight:1.7}}>
If you own rental properties, the <strong style={{color:"#f1f5f9"}}>equity (market value minus what you owe) counts toward your total assets but is <strong style={{color:"#fde68a"}}>not included in investment projections — real estate is illiquid (hard to sell quickly) and appreciates differently than stocks or bonds. Net rental income, however, is added to your monthly income.
</p>
</Cd>
